

# Stakeholder Interview Guide

**Client:** Mentoring Division — Center for Student Affairs (CSA), University of Asia and the Pacific

**Duration:** ~60 minutes | **Purpose:** Gather the raw material for your Organizational Model, Tailored Framework, Principles Catalog, and Request for Architecture Work (RAFW)

---

## Before You Start

- Confirm who's attending (ideally the division head + one coordinator who handles day-to-day work — different perspectives surface different problems)
  - Bring a note-taker separate from the person asking questions, if your group size allows
  - Ask permission to record, or explain you'll be taking notes for a school project
  - Have a one-line explanation ready: *"We're students studying Enterprise Architecture, and we're using your division as a case study to propose (not build) an improved way of handling [X], purely as an academic exercise."*
- 

## Part 1 — Opening & Context (≈5 min)

**Goal:** Build rapport, confirm scope, understand who you're talking to. **Feeds:** Deliverable 1 (Organizational Model)

1. Could you briefly describe your role and how long you've been involved with the Mentoring Division?
2. In your own words, what does the Mentoring Division do, and who does it serve?
3. Roughly how many mentors and mentees are involved in a typical semester?

*Transition line: "That gives us a good picture of the division overall — I'd like to zoom in next on how it fits within CSA and the university."*

---

## Part 2 — Organizational Structure & Stakeholders (≈10 min)

**Goal:** Map who's involved and who decides what. **Feeds:** Deliverable 1 — Boundary/Scope Statement, Stakeholder Map, RACI

4. How does the Mentoring Division fit within the larger Center for Student Affairs? Who does it report to?
5. Besides yourself, who else is directly involved in running the mentoring program (coordinators, faculty advisers, student assistants)?
6. Are there other university offices or departments the Mentoring Division regularly works or interfaces with (Registrar, IT, specific colleges/schools, etc.)?
7. If a new tool or process change were introduced, who would need to approve it? Who would actually use it day-to-day?
8. Does the program run the same way across all colleges/departments at UA&P, or does it vary by unit?

*Transition line: "Now that we know who's involved, walk us through how things actually happen day-to-day."*

---

## Part 3 — Current Processes & Tools (≈15 min)

**Goal:** Establish the baseline — what exists today. **Feeds:** Deliverable 1 (baseline capabilities) + informs Deliverable 2 (Tailored Framework)

9. Walk me through the process from start to finish: how does a student become a mentee, and how do they get matched with a mentor?
10. How are mentoring sessions scheduled and tracked once a match is made?
11. How is a mentee's progress recorded or followed up on over time?
12. What tools do you currently use for any of this — spreadsheets, forms, email, a shared drive, a dedicated platform?
13. Who is responsible for maintaining/updating this information, and how often?
14. Is there any reporting you currently do (e.g., to CSA leadership) using this data? How is that report put together?
15. Roughly how much of this process is manual versus automated?

*Transition line: "That's really helpful for understanding how things work now — I'd like to shift into what's not working as well as you'd like."*

---

## Part 4 — Problems & Desired Improvements (≈15 min)

**Goal:** Surface pain points and what they actually want addressed. This is the core of your interview.

**Feeds:** Request for Architecture Work (business goals, strategic drivers)

16. What's the most frustrating or time-consuming part of managing the mentoring program right now?
17. Where do things tend to break down or cause delays — matching, scheduling, tracking, communication?
18. Has this always been a problem, or has something changed recently (growth in mentees, staff turnover, new requirements) that's made it worse?
19. Have you tried to fix this before? What happened?
20. If you could wave a magic wand and fix one thing about how mentoring is managed, what would it be?
21. What would "success" look like to you a year from now?
22. Is there a specific part of the process you'd want our group to focus on, or is it more of an end-to-end concern?
23. Is there a deadline or upcoming event (new semester, accreditation review, expansion of the program) that makes this more urgent?

*Transition line: "Good — that gives us a clear sense of the 'why.' A few last questions on what would and wouldn't work as a solution."*

---

## Part 5 — Priorities, Values & Constraints (≈10 min)

**Goal:** Understand what matters to them and what limits a solution. **Feeds:** Principles Catalog + RFAW (constraints)

24. What matters most to you in how student data is handled — privacy, accuracy, ease of access, something else?
25. Are there any university policies, data privacy rules, or compliance requirements we should be aware of when handling mentee/mentor information?
26. Is there any existing university system (student portal, LMS, etc.) that a future solution would need to work with or avoid duplicating?
27. How comfortable is your team with adopting new tools or changing how they currently work?
28. Realistically, who would need to be trained or onboarded if something changed?
29. Is there anything that's completely off the table — a tool, approach, or change you know wouldn't be accepted?

*Transition line: "Last few questions, then we'll wrap up."*

---

## Part 6 — Wrap-Up & Next Steps (≈5 min)

**Goal:** Close the loop and set up follow-up validation.

30. Is there anything about the program or its challenges we haven't asked about that you think we should know?
31. Is there anyone else you'd recommend we speak with (another coordinator, a mentor, a student)?
32. Once we've drafted a summary of what you've told us today, would you be open to a short follow-up to confirm we captured it accurately?
33. What's the best way to reach you if we have follow-up questions?

*Closing line: "Thank you so much for your time — this gives us exactly what we need to get started. We'll follow up with a short summary for your review."*

---

## Quick Reference: Question → Deliverable Map

| Part                                | Deliverable it feeds                                          |
|-------------------------------------|---------------------------------------------------------------|
| 1. Opening & Context                | Background for all deliverables                               |
| 2. Structure & Stakeholders         | Deliverable 1 — Organizational Model                          |
| 3. Current Processes & Tools        | Deliverable 1 (baseline) + Deliverable 2 (Tailored Framework) |
| 4. Problems & Desired Improvements  | Request for Architecture Work                                 |
| 5. Priorities, Values & Constraints | Principles Catalog + RFAW constraints                         |
| 6. Wrap-Up                          | Validation step for your drafts                               |

**Time-management tip:** Parts 3 and 4 are the highest-value sections — if you're running short on time, protect these first and trim questions from Parts 2 and 5 (you can often infer org structure and constraints from context, but you can't invent their actual pain points).
